

From time to time we will post listings here for used SlideSnap equipment for sale by private parties.

2 listings

SlideSnap Pro G4 with a Nikon 5300 camera 23MP, Tamron SP AF90mm F/2.8 SP DI Macro 1:1 lens, A Carousel Slide Tray: Stack Loader and Slide Duster (500 watts) ALL INCLUDED - A great Deal!

Price: \$3200 OBO (Shipping included!)

I have retired this year and used this unit for two major projects only, less than 3000 slides. Unit has always been covered when not in use. It is a working unit, but is sold as-is and no returns. Support can be found through this website. Simeon and everyone at SlideSnap are awesome folks to work with.

Like-new SlideSnap Pro G4 with a Tamron 90mm Macro 2.8 SP DI VC lens for Canon

cameras.

Price: \$3445 OBO (Shipping included!)

This unit was only used for a few projects with specific requirements that this scanner met, and is in excellent condition. Less than 5,000 slide captures were performed, and the scanner shipped new only 7 months ago. All original accessories included. Unit has always been covered when not in use. Unit will be shipped in original shipping box. It is a working unit, but is sold as-is and no returns. Support can be found through this website. The Tamron lens was ordered new 7 months ago, and is for Canon cameras only. I also have over 25 Kodak carousels (mixture of 80 and 140) which make a great addition to the scanner. I will make a deal on those too if interested. Contact me at TimR@CurrentPixel.com

Note: The Canon T4i camera pictured is NOT included. You will need to add one of the recommended Canon cameras found on the manufacturer website to use the scanner.
